

FOR IMMEDIATE RELEASE

DELTA® INTRODUCES THE LATEST IN HANDS-FREE TECHNOLOGY TO THE HEALTHCARE INDUSTRY

1500T Gooseneck Electronic and 3000T Third Generation Upgrade added to Delta's commercial offering of products

The 1500T Wallmount Gooseneck Electronic faucet also features:

- *Digitally adjustable sensor length and maximum run times*
- *Four mounting options*
- *A modern chrome finish*

TORONTO, ON (February, 2009) – Delta® introduces the new 1500T and 3000T Third Generation Upgrade Gooseneck Electronic faucets – making it easier than ever for healthcare professionals to quickly and easily sanitize without the need to touch potentially contaminated surfaces. Also, the 3000T model is now available with a controller which can specify everything from run time to sensor range – all to match the specifications of the users.

1500T Gooseneck (GN) Electronic Sink Faucet

The 1500T Gooseneck (GN) Electronic Sink Faucet enhances Delta's electronic offerings and builds on the innovative internally-developed H₂Optics™ electronic technology previously seen in Delta's flush valves and faucets. These new electronic Gooseneck models include hardwire and battery-operated options and offer cost-conscious

healthcare customers the benefits of an electronic gooseneck faucet with basic features. Delta's H₂Optics electronic technology is one of the most advanced sensing technologies available in the industry today. With the ability to accurately sense the user's distance, regardless of external factors such as light reflection, clothing colour and textures or dryness of one's skin, H₂Optics provides consistent, dependable results.

3000T Third Generation Upgrade

Delta's programmable 3000T Gooseneck Electronic Faucet has undergone an upgrade and now includes the innovative H₂Optics technology and offers a more modern look and feel. With its state of the art control panel, Delta's H₂Optics electronic technology allows the user to set and adjust the faucets according to their unique applications.

.../more

Immune to colour, material texture, ambient lighting, dryness of skin, this infrared electronic handwash system is available as battery operated or hardwire (24VAC). The corresponding 3000T Control Module has a self-test feature which makes troubleshooting simple. It also houses a pre-loaded instruction manual and an audible low-battery indicator and is available in multiple installation options, including: surface or recessed mount control box and various mixing options.

Additional upgrades include:

- 4 'C' batteries to improve the life of the faucet
- A new smaller controller with digital display, six adjustment options and meter mode, also available with three position switch add on option for flushing water lines
- The gooseneck spout is a rigid connection assembled to the turret/sensor, allowing for a smoother more hygienic spout. The goosenecks are limited to R5, R3, R7, and R35
- Chrome plated one piece cast main body with integral sensor and rigid spout
- Visual battery strength indicator
- Field adjustable water resistant program controller with LCD screen
- Controller retains adjusted settings in event of power failure
- Sensor upgraded to adjustable H₂Optics electronics which is immune to colour, material texture, ambient lighting and dryness of skin

3rd Generation 3000T Control Module

Adjustable settings

- Run time—the length of time water will run after the user removes their hands from sensing zone
- Sense time—amount of response time it takes for the sensor to react to hands placed in sensing zone.
- Block time—amount of time required between uses. This prevents the faucet from running water excessively.
- Sensor range—the distance at which the sensor will detect hands in the wash area.
- Auto timer—the length of time before the faucet stops running in the event that the sensor is obstructed by a foreign object.

About Delta

Delta Faucet Company's commercial products are a leading choice of North American plumbing and mechanical contractors, engineers and architects. Delta's commercial offerings combine relevant, innovative features and exclusive technology with uncompromising quality. Delivering design solutions to meet project requirements, Delta's commercial products offer a full array of sleek, contemporary, sophisticated options that are highly functional to suit every need. Delta's product-trained customer service department, exclusive SpecSelect® program that facilitates product selection and five-year limited warranty on most commercial installations make Delta a market-leading product line. A worldwide leader in faucets and related accessories, Delta has a product for almost every application.
