

FOR IMMEDIATE RELEASE

DELTA® OFFERS MODERN AND DURABLE COMMERCIAL WALL MOUNT FAUCET
DEMD 400 Series Wall Mount Faucets are as versatile as they are attractive

TORONTO, ON (July, 2009) – Delta introduces a clean-lined wall mounted electronic lavatory faucet to its commercial offering of products. This durable and stylish faucet comes in two spout lengths: 8” and 6”.

Constructed of all metal, this heavy duty wall-mounted electronic faucet uses an infrared sensor underneath the spout to sense the user's hands. The sensor is adjustable for settings such as; range, flow time, delay in and out, on/off and reset. As an extra vandal resistant feature, the faucet will automatically shut off after being used for more than 90 seconds. The sensor also features a low battery level indicator.

The robust installation in-wall mounting plate helps keep the faucet spout secure in higher-risk vandalism areas. Additionally, the mounting plate allows you to install the rough and reserve installing the spout trim until all work is completed in the restroom there by protecting the spout against damage while the space is under construction.

The DEMD 400 Series electronic wall mount faucets flow at an efficient 0.50 gpm (1.90 L/min) provide 77 per cent water savings and can contribute to LEED certification.* An optional 1.0 gpm (3.8 L/min) aerator available separately also contributes to LEED certification, providing 54 per cent water savings.*

**Water savings calculated versus Industry Standard ASME.A112.18.1/CSA.B125.1 of 2.2 gpm (8.3L/min) at 60 PSI*

“The DEMD 400 Series faucets are such a versatile product. The modern lines lend the product to fit into contemporary designed public facilities. They also allow cleaning in most applications” says Peter Ashton, Business Development Manager for Delta Commercial products in Canada. “The well designed in-wall installation plate also adds incredible stability and durability.”
