

DELTA® EXPANDS PROXIMITY™ SENSING TECHNOLOGY
Delta's hands-free technology now available in classic and durable designs

TORONTO, ON (July 2011) – In response to the high demand for its hands-free technology, Delta Faucet Company is expanding its Proximity™ Sensing Technology line to include three classic commercially-styled lavatory faucets. This unique technology can sense a user's hand when it enters the 4" field around the body of the faucet, turning the faucet on. The user easily turns off the faucet by removing their hands from the water stream. The designs, free of optics and infrared, are easy to maintain and fit into any commercially-designed facility.

590TP Series

Proximity Sensing Technology has been added to Delta's 590TP, 591TP and 590-PHDF series. The 590TP and 591TP series feature a one piece cast brass body designed to endure and withstand heavy-duty usage. These classic designs are modern yet practical and easily reflect the personality of individual institutions.

Installation is user-friendly as the faucets self-calibrate once installed. All three series feature a surface mount control box making it easy to access the electronics for installation and routine facility maintenance. The vandal resistant outlets are particularly useful in high traffic environments.

591TP Series

"We received such a tremendous response for our Proximity Sensing Technology, we decided to expand the line to include some of our most popular commercial products," says Peter Ashton, Business Development Manager for Delta Commercial products in Canada. "Whether customers are developing a new community centre or renovating a medical facility, we are confident that this technology's reliability and innovation will anticipate everyone's needs."

590-PHDF

Key Features of Proximity™ Sensing Technology with 590TP, 591TP and 590-PHDF series:

- Solid brass construction in 590TP and 591TP series
- Versatile design and technology for installation in many applications
- Faucet automatically shuts off two seconds after the user's hand is removed from the water stream
- Auto shut-off feature. Factory set to 45 seconds. Will reset once obstructions are removed
- Low battery audible beep when 1500 cycles remain
- Utilizes a cold or tempered water supply, making it ideal for new or retrofit situations where tempered water is available
- 0.5 GMP/1.9 L/pm flow rate can contribute to LEED certification
- Battery and hardwire models available
- Vandal resistant outlets standard in all products
- 5-year limited warranty

About Delta

Delta Faucet Company's commercial products are a leading choice of North American plumbing and mechanical contractors, engineers and architects. Delta's commercial offerings combine relevant, innovative features and exclusive technology with uncompromising quality. Delivering design solutions to meet project requirements, Delta's commercial products offer a full array of sleek, contemporary, sophisticated options that are highly functional to suit every need. Delta's product-trained customer service department, exclusive SpecSelect® program that facilitates product selection and five-year limited warranty on most commercial installations make Delta a market-leading product line. A worldwide leader in faucets and related accessories, Delta has a product for almost every application. For more information on Delta's commercial products, visit www.deltacommercialfaucets.com or call toll-free at 1-800-345-DELTA(3358).
