

see what Delta can do™

COMMERCIAL PRODUCTS

WHAT OUR **SMART SOLUTIONS** CAN DO FOR YOU.

DELTA.® A BETTER WAY TO EXPERIENCE WATER.

Hotel guests, restaurant patrons, facility visitors, office workers, multifamily residents, and health care providers and patients access and use water for similar reasons. Yet, their needs are as individual as they are.

Delta believes there is a better way to live with water and has developed smart solutions that meet the unique requirements presented by each commercial environment. Providing individuals with a better way to experience water, while standing up to prolonged, rigorous use.

Style meets performance with Delta commercial plumbing products that not only provide long life, but also enhance their environments.

Delta commercial products can also contribute to a sustainable building with water-saving technologies that contribute to LEED® certification. And, all Delta commercial products are backed by the industry's best 5-year limited warranty.

Discover the unique solutions that make Delta a smart choice for your commercial applications.

OPERATE **HANDS-FREE.**

Proximity™ Sensing Technology.

For the most responsive electronic faucets in the industry, look no further than Delta® faucets featuring Proximity Sensing Technology, the next generation in hands-free functionality. Proximity Sensing Technology enables one to turn on the water simply by placing a hand near the faucet spout. The entire faucet body acts as a sensor, responding when activated. There are no optics or infrared to maintain. Consider Proximity Sensing Technology for an all-around responsive faucet experience.

H₂Optics™ Technology.

Responsiveness is key with hands-free functionality. Delta electronic faucets and flush valves with H₂Optics Technology operate consistently, time after time, regardless of interference factors such as dark clothing or lighting conditions. All electronic faucets and flush valves featuring H₂Optics Technology are water efficient*—contributing to LEED® certification.

*Water-Efficient Product—Lavatory faucets: flow of 1.5 gpm versus Industry Standard ASME.A112.18.1/CSA.B125.1 of 2.2 gpm.

ADD DURABILITY.

DIAMOND™ Seal Technology.

Long faucet life is crucial in keeping maintenance hassles and building operating costs at a minimum. DIAMOND Seal Technology combines a durable DIAMOND™ Valve with InnoFlex™ PEX waterways for no leaks and a longer life. The DIAMOND Valve features a disc embedded with real diamonds to last up to 10 times longer than the industry standard.* Once inside the faucet, water is not in contact with metal contaminants. That's durability you can count on.

LESS HASSLE.

All the parts needed for installation are in the box.
No risers required.

LEAK-FREE.

The threat of leaks is all but eliminated thanks to the exclusive one-piece InnoFlex PEX supply lines, DIAMOND Valve and no dynamic seals. The patented DIAMOND Valve eliminates leaks and drips from the valve. The valve requires no lubrication, eliminates wear on seals, and ensures "like new" operation for life.

LONGER LASTING.

The DIAMOND Valve lasts up to 10 times longer than the industry standard.*

LEAD-FREE.

Once inside the faucet, water is not in contact with potential metal contaminants.

*Industry standard based on ASME.A112.18.1 of 500,000 cycles.

ENHANCE THE EXPERIENCE.

H₂Okinetic Technology®

In the shower, individuals seek a private space where they can relax, escape, awaken, contemplate, refocus and more. H₂Okinetic Technology transforms this space by providing a truly better shower experience using less water. Its warm, luxurious, drenching water coverage is the result of a denser water pattern and larger droplets that retain their heat longer. The effect feels like 2.5 gallons per minute, but is just 1.5 gallons of water per minute. As a result, H₂Okinetic Technology is environmentally smart, meeting strict water-conservation standards and helping building owners save on their utility costs. Its efficient use of water helps contribute points toward LEED® certification.

TempAssure®

Water that is too hot can scald skin in the shower and pose a safety hazard. Delta® has anticipated this concern with TempAssure Thermostatic valves that keep the water in the shower within a safe $\pm 3.6^{\circ}$ F. It's an ideal solution for hospitals and long-term care facilities. An adjustable high-temperature limit stop eliminates the worry that an individual may set the water too hot for comfort.

BUILD IN FLEXIBILITY.

MultiChoice® Universal.

One rough. Unlimited possibilities. MultiChoice Universal provides the flexibility to upgrade the style or functionality of showers without altering the plumbing behind the wall. Saves time and hassle—streamlining the whole plumbing and installation process while eliminating the opportunity for the wrong valve in the wall. More refined temperature limit stop allows temperatures to be set more precisely.

DESIGN IN SUSTAINABILITY.

Responsible by Nature.™

As part of a company that delivers water every day through millions of faucets worldwide, Delta provides commercial products that address today's water conservation and no-lead legislation, as well as accessibility. These smart water delivery solutions maximize water efficiency and the life span of the products, without sacrificing the comfort and convenience of the user experience.

Delta® is committed to sustainability and providing smart water delivery solutions that maximize water savings without sacrificing comfort and convenience. Our commitment to sustainability extends to waste reduction and the preservation of natural resources and the environment. That's why we print on Forest Stewardship Council (FSC) certified paper made with renewable energy.
